ENDURA-PRO™

REFUEL, RECOVER REPAIR

EnduraPro™
is available in **Lemon-Lime**
and **Fruit Punch 800g**

EnduraPro™ provides essential nutrients to the muscles to reduce muscle fatigue, increase oxygen capacity, and promote muscle protein synthesis during exercise to improve endurance and stamina.

Direction of use: Mix 2 scoops with 500 mL of water or favourite beverage of your choice. Take 1 serving before and 1 serving during your exercise or physical activity.

Ingredients: Carbohydrate Blend (Maltodextrin, Dextrose, Fructose, Carbogen) Pepto Pro Casein Hydrolysate, Natural and Artificial Flavour, Citric Acid, Dipotassium Phosphate, Monosodium Phosphate, Tricalcium Phosphate, Sucralose, Acesulfame-K, Colour.

Ingredients and nutrition facts may vary per flavour.

 PeptoPro™ is a registered trademark of DSM

 Carbogen™ is a registered trademark of Triarco Industries and Carbogen™ is protected by U.S. Patent No. 5817350

The patented formula provides instant delivery of building blocks (amino acids) to the muscle for Fast Muscle Refueling during exercise, while encouraging muscle recovery and repair. When taken prior to physical activity, EnduraPro™ extends the time before muscle breakdown occurs and reduces muscle trauma during exercise which may prolong periods of intense exertion and endurance. Formulated to provide nutritional support to overused muscles, EnduraPro™ has been proven to recharge the muscle battery faster during activity while encouraging muscle recovery. Use EnduraPro™ before and during your exercise routine to sustain high energy levels, train harder, improve stamina, minimize soreness and speed up muscle recovery. EnduraPro™ meets the criteria of the World Anti-doping Code.

EnduraPro™ contains patented PeptoPro® that enables athletes to use before and during exercise without the side effects of lactose, fat and GI disturbances, providing instant delivery of building blocks (amino acids) to the growing muscle. PeptoPro® is unique in being a pre-digested milk protein, derived from casein which provides sustained energy levels to muscles. The secret lies in a patent-protected enzyme that reduces the typical bitter taste at the same time as generating tiny protein fragments (so-called peptides) that are rapidly absorbed into the bloodstream to fuel the muscles. EnduraPro™ features exceptional ingredients of di and tri-peptides and is absolutely water-soluble, making it great tasting and thirst-quenching, while composing all 20 amino acids in natural form of casein.

Carbogen® in EnduraPro™ is the patented enzyme system that takes complex carbs and explodes them into usable energy, making Carbogen® an ultimate essential to maximize the use of complex carbohydrates. Carbogen® is shown to lower blood lactate levels by an outstanding 275% just 30 minutes into your intense workout. Experts believe that Carbogen® helps maintain glycogen by converting carbs and burning them as energy before glycogen is stored in the body.
